

Case Study

Oracle - E-Business Suite Cloud Migration

*Top choice
in the on-premises
ERP era*

Overview

Maximus is a leading provider of health and human services worldwide employing over 30,000 employees with an annual revenue of \$2.4 billion.

In their Digital Transformation journey, E-Business Suite along with 5 different applications related to insurance and health care were required to be migrated.

Key Challenges

- Incomplete documentation of interdependencies
- The current data center provider announced a hard shutdown date
- In-house team lacks expertise in cloud and migrations
- Due to PHI & PII and state requirements there was no direct connectivity available

Services Provided

- We conducted a detailed assessment & application mapping exercise
- The developed phased migration approach assessment resulted into a phased migration methodology
- We developed customized scripts for Oracle data migration and built an intermediate standby
- Developed architecture compliant with HPPAA and State Auditor requirements
- Use employed or utilized rather than adapted
- A gold environment was built first and five lower environments were built from it
- Successful cutover was achieved within 48 hours

Outcome

- Major cost saving up to 45% reduction in the infrastructure OPEX was achieved
- Enhanced agility and faster time to value
- The customer was able to win the re-bid successfully from the state
- Articulate what improvements directly led to win
